Directions: Copy this document (not the directions) into your Canary Token! Use your real name, but fake everything else. Make it look real. For the private filestore, I would suggest creating a second Canary Token (use the Webbug Link) and change the text that shows up for the link to something like Google Drive or similar. You can probably leave the passwords alone, since that shouldn't trigger any red flags. Do some creative formatting to make this document look like your own.

My Passwords and stuff

Details
• Your Name Here
• DOB = 10 - August 1972
• Drivers License = 2948E193
• Social Security Number = 584-88-5145
• Passport Number = 111 800 437
• Mothers maiden name = Smith
